Please allow XM to continue to broadcast traffic and weather reports. As a frequent traveler I know just where to tune for weather and traffic updates in whatever city I happen to be in. Without XM would waste a great deal of time trying to determine which local station carried local traffic and weather. Not only was it time consuming but it was a potential distraction from driving. With XM I can preprogram my radio for the cities I will be traveling through and get the information I need at the touch of a button.
